

Corporate Fact Sheet

Company:

EDX Wireless, Inc.

EDX Wireless, headquartered in Eugene, Oregon, develops wireless Radio Frequency (RF) planning, performance visualization and design software. It offers some of the industries most widely used engineering software tools for planning and designing wireless communications networks. These products support a growing range of standards including wireless broadband, WiMAX, LTE, Wi-Fi, public safety, and many other mobile wireless technologies.

Since 1985, EDX customers have relied on SignalPro®, our flexible and comprehensive suite of RF planning tools.

The result of over 25 years of development effort, SignalPro is used by thousands of engineers in over 60 countries and is the tool of choice for designing accurate, reliable and scalable RF networks, worldwide.

Products/Services:

EDX offers a growing portfolio of RF planning products including EDX SignalPro, Network Design Module, SignalMX® Module, Microcell/Indoor Module, and SIGNAL®.

The comprehensive range of EDX SignalPro wireless network planning tools are used in the deployment of LTE, WiMAX, Wi-Fi, LMDS, PCS/cellular, paging, LMR/SMR, broadcast and other wireless systems. EDX tools perform area-wide coverage/interference studies, point-to-multipoint studies, mesh studies, and detailed link analyses. Specialized modules are available for complete network design, including mesh and 3D microcell ray-tracing.

EDX SignalPro is widely used in many growing and diverse markets: public safety, utilities (including gas, electric and oil), smart grid planning and deployment, transportation, broadband wireless and cellular network deployment.

Customers:

Our customers include a veritable who's who of the wireless industry and together they illustrate the wide ranging and industry spanning application for our products. Key customers include:

Clearwire	IBM	SCE
QUALCOMM	ARINC	EADS
Barrett Broadband	American Electric Power	Raytheon
Alcatel/Lucent	Comverge	Lockheed Martin
GE Digital Energy	XM Satellite	Northrup Grumman

Year Established:

1985

Key Executives: Mark Chapman, CEO
Ted Hicks, Vice President of Engineering
Dr. Scott Blumberg, Executive Director of Software Development
Steve Webster, Director of Product Management
Brian Cochran, Director of Support Services
Dr. Harry Anderson, Founder

Partners: Aperto Networks
Berkeley Varitronics Systems
Colubris Networks
EGS Technologies
Firetide
Fortress Technologies
LCC
MediaFLO
POS DATA
SIRADEL
TeleResources
TROPOS Networks
WirelessLogix
