

PRESS RELEASE

FOR IMMEDIATE RELEASE

CHINA'S LARGEST EQUIPMENT VENDOR, ZTE SELECTS EDX WIRELESS LLC'S NETWORK DESIGN TOOLS FOR DEPLOYMENT OF 3.5 GHz FIXED WIRELESS NETWORKS THROUGHOUT ASIA

The EDX SignalPro® suite of wireless network design and planning tools provide ZTE with unmatched features from initial network design and deployment through network maturity.

EUGENE, Ore., May 27, 2004 — EDX Wireless LLC, the leading provider of comprehensive wireless network planning tools, along with Canada Poly-Tech Consulting Inc. and ZTE Corporation, China's largest listed wireless telecommunications equipment provider, announced that EDX SignalPro® was selected to design and deploy 3.5GHz wireless networks currently being built by ZTE throughout Asia.

EDX has been developing software for the wireless communication industry worldwide since 1985. EDX SignalPro has been the tool of choice for Fixed Wireless deployments since its initial release in 1997. It is the most advanced, comprehensive, PC-based software package available offering a complete set of features for wireless communication systems from 30 MHz to 100 GHz.

“EDX Wireless LLC along with Canada Poly-Tech Consulting Inc. is honored to have the opportunity to support China's largest equipment manufacturer in their network deployments and we are committed to providing innovative features to meet their current and future needs. The selection of SignalPro by ZTE is testament to the quality of our tools and our worldwide support teams,” comments EDX CEO Steven M. Totty.

Canada Poly-Tech Consulting, the EDX distributor in China, established the relationship between EDX and ZTE. Mr. Samuel Xu, President of Canada Poly-Tech Consulting, added, “Canada Poly-Tech Consulting's mandate is to introduce the most advanced products and technologies into the Chinese market, and EDX SignalPro is a bright star in the portfolio we offer to our customers in China. With the fast growth of 3.5GHz system deployment in China, and the proven performance of EDX SignalPro during the system implementation, we are expecting more orders of EDX SignalPro from System suppliers and Operators in China.” Canada Poly-Tech Consulting will be providing the local support for ZTE.

ABOUT ZTE Corporation

ZTE Corporation is China's largest listed telecommunications equipment provider specializing in offering customized network solutions for telecom carriers worldwide. The company develops and manufactures

telecommunications equipment for fixed, mobile, data and optical networks, intelligent networks and next generation networks as well as mobile phones.

ABOUT Canada Poly-Tech Consulting Inc.

Canada Poly-Tech Consulting Inc. (CPTC_Canada) is a Canadian engineering and business consulting company focusing on the Telecommunication industry. Incorporated in July 2000 in Calgary, Alberta, Canada, CPTC_Canada's primary function is to serve North America and other foreign companies in managing customer accounts in China, setting up and managing their China-based Sales offices, technical support centers, Manufacturing or Assembly operations.

ABOUT EDX Wireless LLC

EDX Wireless is the world leader in PC based wireless network design tools. In over 55 countries, EDX's tools are employed to design wireless networks including fixed broadband, MMDS, WiFi, WiMAX, cellular, PCS, and mobile radio of all types from 30 MHz to 100GHz. SignalPro, the company's flagship engineering package is the result of nearly 20 years of development effort, including pioneering some of the most significant innovations in propagation modeling including 2D and 3D ray-tracing techniques.
